PROFILE

Self-taught web developer with a strong interest in Front-end development. I am passionate about learning new things and constantly updating my skills to stay up to date with the latest trends and technologies. I am a highly challenge oriented individual and always on the lookout for new opportunities to improve and grow both personally and professionally.

EXPERIENCE

Front-end Developer

KadaSoftware   jul 2023 - present

- Development valuable products on the front-end, creating components, screens, and navigation flows for an optimal user experience.
- Usage of React JS and TypeScript, along with Material UI and Formik, to build attractive and functional interfaces.
- Development of unit tests for components.
- Consumption of APIs to obtain and manage data.
- Collaboration with the design team for low and medium-fidelity prototypes, ensuring cohesive and visually appealing user interfaces.

Web Developer

Freelance   feb 2023 - jul 2023

Developing Ceniza MX, an online store for the sale of herbal infusions and products.

- Planning and designing the project.
- Use of libraries like React JS, React Router V6, Material UI, Formik, and Zustand
- Implement creative solutions to resolve technical issues.
- Developing RESTful API with Node.js to handle the application's services.
